Jennifer Ogorek
Practice Manager, Business Analysis

Jennifer is a Practice Manager of Business Analysis at SVA Consulting. Alongside a team of highly skilled business analysts, she focuses on solution design and develops complex processes and systems for clients in the Life Sciences industry.

Her specialty is business requirements and process design, solution development, and implementation. She possesses a fundamental ability to translate ambiguous concepts into tangible models that she uses to facilitate discussion and debate among stakeholders. She excels at aligning stakeholders to solution designs and guides implementation to ensure actions are well-coordinated and produce intended results.

Jennifer epitomizes continuous learning from client engagement experience and her pursuit of certifications. Within SVA, she establishes business analysis best practices. She has a Black Belt in Lean Six Sigma for process improvement and is trained in Veeva Development Cloud and Commercial Cloud.
